Eretan Kulon Village

Eretan Kulon Village in Indramayu is facing serious problem with low economic fish waste. Because of low education and skill, the fishermen don't have the knowledge and skill to process low-economic fish into added value product. The low-economic fish then become waste around the coastal areas.

The fishermen wives is economically fragile, they lay only on their husband's unstable income from fishing and need to be empowered. Further actions are needed to process the bycatch fish waste into added value products

Program Structures

Fish protein hydrolysate
(FPH) product based

Transforming to

First! high protein snack from **barracuda fish skin**
fortified by fish protein hydrolysate (FPH)

Special Marketplace for
empowerment product of
Berikanpreneur program

FPH is a fish protein extract in the form of essential and non-essential amino acids in powder which is processed from low economy fish (Selar, Petek).

Hands on Learning, Lasting Impact

What We Faced, and How We Solve It

Turning Fish Skin into Opportunity

From Fish to High-Protein Products

Fish skin product training empowered fishers' wives with hands-on skills they can proudly transform into opportunities to improve the welfare of their families and community.

Challenges

Communication barriers with community members; especially with local person of fishers' wives

Solutions

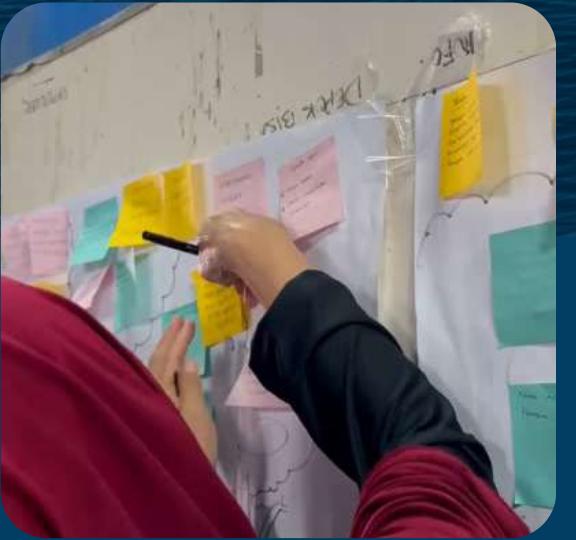

- **Used local language and local trainers** to improve understanding of key messages.
- **Formed community groups, including youth**, as agents of change in our Training of Trainers (ToT) program.

OPPORTUNITIES FOR IMPROVEMENT

Expanded Target Participants

Involved youth—especially vocational high school graduates from fisher families with digital skills, so they can indirectly contribute to improving their families' welfare.

Enhancing Visual Impact

More visuals and hands-on practice in future training sessions to enhance participant engagement and deepen understanding of the material.

Provide Childcare Space

Create a safe childcare area to support mothers' full engagement during training

3

FUTURE PROGRAM RECOMMENDATION

01. Strengthen Community Structures

By supporting better group **organization and coordination**, encouraging youth leadership to drive their own initiatives

02. Engage Youth

By **involving young people** to support their parents and contribute their digital skills to strengthen the community.

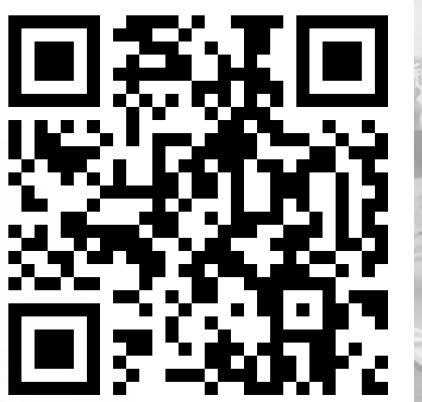

03. Foster Sustainability

By strengthening community structures and establishing **production houses** to ensure the business continues thriving even after the program ends
